About This Game

When Sable is accepted into Amadronia Magic Academy, he believes that his dream of becoming a world-renowned magic researcher is finally within his grasp. As one of the few pure-blooded humans capable of using magic, Sable is hopeful that he'll find common ground with the demi-human population at the school, and that the next few years of his life will be as productive as they are enlightening.

Unfortunately for Sable, his first day at Amadronia quickly proves to him that this will not be the case. The students in his class are unruly, there's a pyromaniac dragon girl running around, his "teacher" has no interest in teaching, the principal wilfully breaks academy rules, and it seems like everywhere he turns, Sable finds one more reason to doubt Amadronia's proud legacy.

Will Sable manage to survive at this clearly dysfunctional academy? Or will he, like so many others, leave Amadronia feeling utterly disillusioned?

I really liked the characters in this, like always tho i wish it lasted longer but what we got is pretty good compared to other vn on steam. I keep hoping for the teacher Eris to get a route as well, its also great that new content has been added to the game for free and even if it had been added as dlc instead i would still have paid for it if required. I definitely want more so keep up the good work, i have really enjoyed this game so far.
