This game has added SO MUCH content to the original half-life including:

A LOT OF NEW ENEMIES

LOTS OF NEW WEAPONS

A PERSPECTIVE OF SOMEONE FROM THE MILITARY WHICH WAS DEEMED THE ENEMY OF THE SCIENTISTS

I'd recommend playing this after half-life and if you liked it play Blue shift.. rat killing simulator. Developers do not appear interested in making a finished game, which is too bad, because there is greatness in their premise.. Terrible historical accuracy, awful plane handling, worst voice-over I've ever heard, comically sized restricted airspace and so on. DON'T BUY!. This is a joke, right? I hope I got this in a bundle. I hope I didn't pay actual money for this.

Okay, so anyway, it's basically an extremely short Hatoful Boifriend, with disgusting characters, and a whopping 1 dialogue choice right at the end that determines if you get the gross end where you end up with the grasshopper-headed freak or get straight-up murdered.

Don't pay actual money for this.. \ud83d\udc4f\ud83d\udc4f game review.

Animal super squad is happy wheels but it does not get boring.

I recommend. It is fun.

Bonus points for subscribing to Dolan darker and grandayy.. I have literally only played one match, however, since I feel like all matches will be similar, I am able to report. This game is in extremely early alpha. Yes, I believe that it shouldn't of been released yet. Its playable, of course, but with such little included so far within the game, it could be alot better. I know this game got released very recently and I know this game has some huge potential, if the developers do not run away from it. The game has 4 seperate classes, each with a different primary weapon. The character is equipped with a jetpack. Which really isn't smooth to operate. Kills are counted as are deaths. No XP to collect. No extra weapons. No cosmetics. However, the game is moderately decent to play. Personally, I would only be able to put up with one match at a time. There are a few errors that should be ironed out. The movement speed feels too clunky. Watching an enemy run infront of you and try to keep your crosshair on them is very difficult. This leads to the player not getting kills. Especially with the shotgun. FPS drops every now and then too. Only for a second or two though. When your getting shot, it's so bad. It makes a horrible noise and the screen jolts and flickers and everything. This needs removing and revamping to something modern. Once your getting shot, its hard to see where your actually getting shot from to retaliate. The spawns are awful too. Multiple times I, or an enemy, spawned directly next to someone else. Of course, in a lot of Early Access shooters, this is the case. There are some other minor complaints such as the sniper sensitivity being way too fast and the controls menu not actually opening whatsoever. But, even though there are these errors, its an average play. It's £4 right now on the store, and for playing a match or two here and there, is a good buy. If the developer delivers much more content, this will be a brilliant first person shooter. If I have any information wrong, I'll be happy to edit.. At the time of writing this review there are achievements in the game but not in Steam. It works as the other mosaic games do with no major difference in the mechanics. Some of the mosaics are horrible looking and some are nice which is par for the course. However at this time two levels do not complete and that means you can't finish the levels in those worlds. In the third world level 57 won't complete which blocks 3 levels. In the 6th and final world level 103 won't complete and that blocks 17 levels. So a total of 20 levels can't be played. I'm not asking for a refund b/c I only paid .49USD and it's not worth the

---

trouble. Because of the broken levels I can't recommend the game unless you are paying a very low price and don't mind not being able to get all the achievements.. This is a kinetic novel with a single choice in it. It is moody, lyrical, touching, and with a stinger at the end, exactly what I hope for from Ebi's games.

Anyone who has played several of Ebi's games before will recognize the themes here--this game reminds me the most of her early "Is This the Life?" and Sweetest Monster, but there are a few moments that recall "Strawberry Vinegar," "Asphyxia," and "The Way We All Go."

My one tiny reservation is that I was not a fan of the sprite for Lily (either the old or the new one)--it just didn't grab me. The eyes and the mouth looked a little odd. That small point aside, this was great.

---

do not recommend. Right now it might not be worth buying but later in the future this game is gonna be great and im not hating this game in anyway but for right now buy it at your own risk :) i don't think this game deserves a thumbs down. yoo this game scare the heck out of me hella good love it great game. "In the end" is emptiest lead guitar part that i've seen in whole game. As mentioned in previous user review, "What i've done" get some injection of keys part to lead guitar and it sounds.... normal. There nothing challenging in whole pack, BUT...  
... this pack includes "Guilty all the same!" and this track sound and plays marvelous (if you LP fan, of course).

If you are Linkin Park fan (as I) - you could buy this pack, but don't expect any miracles. If you don't want whole pack (as some songs got some really empty parts), i strongly recommend "Guilty all the same" and "Bleed it out".. Got this game on an awesome special so I don't have many greivences. It's a fun game when you are winning but fairly frustrating when you aren't, the reason this is, is not because the game is too hard but rather the game doesn't allow for much variety in strategies. You will restart over and over untill you find the one strategy that works. This makes it an unbalanced strategy game because you may as well watch a bot vs bot match on any RTS and pretend you are one of the bots. With that said, when you are winning it's quite enjoyable and would be a VERY decent game if this feeling was well maintained. If you find it on special it is likely worth whatever experience you get but I would not pay full price.. 12/10 would take screens with spacebar again. It it appears that Paradox is deleting my negative review of this game. Criticism is not allowed its seems. As so. I have decided to give the whole game and DLC a negatieve review. **Pros:**

- Good graphics and rewarding cutscenes
- 2 playable characters with their own unique movesets
- Satisfying and rewarding combat system
- Fun and challenging boss fights

**Cons:**

- Lackluster story
- No waypoints to tell you where to go
- A lot of backtracking
- Upgrades and items are too expensive. I buy starter kit pro. Play game 1 week. Game was update and I cant start game. In this case i dont need Starter Kit Pro.. Nooooooowhat a dissapointment not what I remember from playing dos deathtrack in 90s
